Hayward's Super Pump® - An Industry Favorite

The Hayward® Super Pump® has been the preferred choice of pool professionals around the world for decades.

The Super Pump is a large capacity, high technology pump that blends cost-efficient design with durable corrosion-proof construction. It features a large strainer cover, super-size debris basket and exclusive "service-ease" design for added convenience. The Super Pump combines advanced technologies for quiet, efficient and dependable operation.

The Super Pump is available in fixed speed and variable speed versions.

Elegant Pool Automation at an Affordable Price

The Hayward OnCommand® is the most affordable way to automate essential pool and spa functions for new and after market applications.

The OnCommand® is a full featured, easy to use control for an entry level price. The unit features a Hayward branded durable plastic enclosure with a large accessible wiring compartment. The OnCommand® can be used to set the filtration times, control heaters, valve actuators and other equipment. Use the three separate relays to control lights, water features, jet pumps and other equipment.

Aquapod 2.0

The OnCommand® has optional wired and wireless remote controls including the new state of the art touch screen AquaPod 2.0.

Hayward's AquaRite #1 in the World

As the global leader in salt chlorination, Hayward® provides luxuriously soft water and the most convenient sanitization method on the market.

The new 900 Series range of AquaRite Salt Chlorination systems are designed to provide the same superior salt chlorination you expect

from Hayward with the T-Cells providing as much as 700lbs of tri-chlor equivalent over their life span.

The new 900 Series systems reduce chlorine costs by 50% or more and feature the industry best 4 year warranty on both the panel and the T-cell.

ColorLogic® Bubbler

The ColorLogic® Bubbler creates a cascading column of water.

The Bubbler comes with a small footprint with interchangeable color trim options and a flush design for seamless integration to the pool surface.

Multiple nozzles offer a wide variety of water heights and widths to match any pool environment. The plume can be adjusted to achieve the desired effect.

The ColorLogic® Bubbler offers the industry's best plume height of 12". Two part design incorporates plaster ring for the ability to adjust angle or height to match the surface of pool.

When matched with Hayward's ColorLogic® Accent lights it creates the ultimate ambiance.

Applications:

- » Sun-Shelves / Tanning Ledges
- » Spas
- » Spill Overs
- » Fountains
- » Splash Pads

Illumination:

The ColorLogic Bubbler can use either a CrystaLogic or ColorLogic 320 / 160 for illumination. A 320 is recommended for depths greater than 4".

ProHayward 3680 Sealed Panel Underwater Light

The new ProHayward 3680 Sealed Panel underwater light should eliminate water ingress into the light.

The 252 surface mounted diodes are on a panel, which, along with all the electronics, is completely encapsulated in resin rendering the assembly water-tight. The white plastic frame is only 24cm in diameter providing a low profile sleek look to this nicheless underwater light.

ProHayward 3680 lights come in two versions: the RGB version has 7 colors and 8 color shows controlled by the on-off switch. The WHT version for the first time has the options of daylight and warm white.

The light will be available to ship September 2018.
