

HCP3000 SERIES PUMPS - Harness the Power

The **Hayward HCP 3000 Series** pumps are engineered for heavy-duty durability. A wide range of power options means you can provide the optimum solution for any pool delivering maximum performance and uncompromised efficiency.

The HCP3000 Series Pumps deliver unmatched versatility, allowing for simple installation in virtually any pool application.

Longer life and lower maintenance. TEFC motors in all models- plus a chemical

Best in Class Performance: HCP3000 Series pumps are the first 3" pumps to achieve hydraulic efficiency of more than 250 gallons per minute at 60' head (7 HP 60Hz model) saving more energy than any comparable pump on the market.

The oversized strainer basket is detachable and can be installed separately allowing for plumbing flexibility.

Detachable Strainer

resistant Viton® seal means less wear-and-tear and dramatically reduced down time.

Available in three phase versions for 2Hp, 3Hp, 5Hp and 7Hp, and in a 2.7HP variable speed version for 50/60Hz, it is a perfect match to trusted and proven Hayward commercial filtration systems.

The HCP 3000 Series pump is manufactured in the United States at the Hayward Clemmons, North Carolina facility.

NSF/ANSI Standard 50 Certified.

HCP Variable Frequency Drives - Enhanced Pump Control with Simple Installation

The **HCP Series Variable Frequency Drive (VFD)** delivers all the savings, efficiency, performance and control of a variable-speed pump—without the need to replace existing single-speed equipment. Compatible with Hayward® HCP Series pumps and many other 208- 230/460 VAC commercial pool pumps.

Easy installation without the need for a drive specialist with adjustable motor RPMs to match the necessary pump flow rate for various pool sizes

Standard NEMA 4X enclosure protects the drive from outdoor elements

The HCP Series VFD provides a budget-friendly solution for added efficiencies in new or existing recreational water facilities.

AquaSolar® GL235 Solar Controller – Go green with a little help from the sun

The **AquaSolar® GL235 Solar Controller** is America's best-selling entry level microprocessor based solar pool heating control system.

The controller automatically maximizes solar heat collection by actuating a 24V valve when there is solar heat available.

GVA-24 Actuator

With a single-setting, precision temperature adjustment - water is heated to a set temperature and circulated back into the pool or spa.

PSV 3-way Valve

Advanced features include programmable recirculation freeze protection, nocturnal cooling, and optional booster pump. LED indicators show status of system operations.

SHEER500 Cascades – A tranquil waterfall effect

Hayward's **Sheer500 Cascades** can be customized to any pool to create an enchanting falling water effect that blends seamlessly into any backyard creating a dramatic visual and acoustic environment.

Available in lengths from 1 ft. to 5 ft. with rear or bottom connection options and with the ability to be installed in both straight and curved applications, the Sheer500 can conform to any pool and spa shape.

The Sheer500 Waterfalls are effective in naturally cooling the pool water a few degrees for a refreshing experience.

Be advised that Hayward/IMG has not changed wire transfer instructions or banking details for more than 10 years.

If you receive any instructions of change from our normal wire transfer details consider this as fraudulent activity and re-confirm banking details with our Customer Service staff or Financial Department representatives.

We have experienced emails intercepted by "hackers" that have changed the banking instructions for wire transfers under our corporate email letter heads and staff names.

When in doubt check with Hayward/IMG representatives.
