

## Universal ColorLogic Lighting with Newly Available Pool and Spa S/S Face Rim Options

*Optional Stainless Steel  
Face Rim for Pool and Spa*

The Universal ColorLogic (UCL) light is the most advanced design in LED lighting.

The UCL LED design is 100% brighter than any other LED lighting and its unique lens broadly distributes more light throughout the entire pool.

The polycarbonate housing assembly is fully bonded without screws and an extra robust cord seal eliminates the possibility of leaks through the cord seal.

Hayward/IMG now offers an optional 316 S/S face for both the pool and spa UCL models.

## Cleans Pool Floor and Walls with Computer Efficiency

SharkVAC XL is the newest addition to Hayward's robotic line-up.

SharkVAC XL combines proven TigerShark technology and high quality components into a sleek, low-profile design.

With easy top-access filter cartridges as a distinctive feature the SharkVAC XL is also a floor AND wall cleaner. Add advanced technology allowing SharkVAC XL to calculate the size of the pool and program an energy efficient cleaning path.

Offer advanced cleaning robotics from the #1 equipment supplier Hayward Pool Products with the new SharkVAC XL.

## Hayward Summit Heat Pumps Provide Perfect Water Temperature

Hayward high performance heat pumps quietly and economically maintain your ideal water temperature at all times.

Available in both 50hz and 60hz versions, Hayward heat pumps incorporate a titanium counter flow heat exchanger for unmatched performance under the harshest conditions.

Advanced features like an innovative Ultra Gold corrosion-resistant evaporator, heavy duty super quiet scroll compressor, molded UV-resistant body panels and stainless steel hardware means that Hayward heat pumps will perform year after year, season after season.

Hayward heat pumps give you comfort and efficiency. It is a perfect addition to your Totally Hayward System.

## TECH NOTE...

### CORRECT SALT SELECTION FOR ELECTRONIC CHLORINE GENERATOR

In all Hayward salt chlorination systems it is important to use the right quality salt of a high purity.

The salt used in the pool must meet the manufacturer's specifications as stated in the manual.

Saline 6.0

- Use salt that contains greater than 99% Sodium Chloride (NaCl). Use of salt with a lower percentage of Sodium Chloride will damage the electrical components and void the warranty.

AquaRite

- Use evaporated, granulated, food grade, non-iodized salt.
- Water softener salt can be used but the larger pellets will take time to dissolve.

- Useable salt is available in 40-80 lb. bags labeled "Coarse Solar Salt or Pool Salt."
- Do not use rock salt, salt with yellow prussiate of soda, salt with anti-caking additives like calcium ferrocyanide, or iodized salt.
- Operate the system for 24 hours until all the salt has completely dissolved.

Maintaining the appropriate salt concentration is also important.

Too much salt can increase the potential for corrosion and also make the water taste and feel more like seawater. Too little salt can result in decreased cell efficiency (lower chlorine production) and shorter electrode life.

Salt & Swim

Hayward/IMG Customer Service Department would be happy to help you with sizing and salt selection for your Electronic Chlorine Generator.

## Value Alternative for Quality Continuous Use Air Blowers

AIRTECH commercial blowers are ideally suited for spas, clubs or luxury villas which put a high demand on spa or pool aeration.

AIRTECH commercial blowers provide continuous operation that is impossible for a mushroom style blower. Built with rugged die cast aluminum construction and an outboard bearing, AIRTECH blowers run quieter and cooler than competing rotary blowers.

What's more, these blowers are value priced against other rotary blowers without compromising performance or reliability.

For public spa, pool and luxury pool applications, let AIRTECH blowers be your first choice in commercial blowers.
