

When Size Matters... HCP 3000 Series Commercial Pump

Hayward's new HCP 3000 Series pumps are the new option when a commercial size pump is needed.

Engineered for heavy-duty durability and fitted with 3" unions on the discharge and suction ports.

The new pump is offered with a wide range of power options providing an optimum solution for virtually any pool while delivering maximum performance and uncompromised efficiency.

HCP 3000 Series

The HCP 3000 has an energy efficient TEFC motor plus a chemical-resistant Viton® seal and F Class insulation for added durability.

Simple, versatile installation. The wide variety of power options and the detachable, modular strainer basket mean HCP 3000 Series pumps deliver unmatched versatility, allowing for simple installation and convenience.

Available in 3HP to 7HP in 50/60HZ the Hayward Series 3000 pump is a perfect match to the trusted and proven Hayward Tandem System or Commercial Filters.

The new Hayward pump was engineered and manufactured in the United States at Hayward's North Carolina main manufacturing Facility.

Hayward's Super Pump® is a Favorite

With its dependable performance, the Super Pump has been a preferred choice amongst pool professionals around the world for decades.

Hayward's Super Pump is a large capacity, high technology pump that blends cost-efficient design with durable corrosion-proof construction.

The Super Pump features a large "see-thru" strainer cover, super-size debris basket and exclusive "service-ease" design for added convenience.

The Super Pump combines advanced technologies with high performance for quiet, efficient and dependable operation.

Liquid Feed System With Easy-Fill Design

Hayward introduced an innovative Liquid Feed System that offers a reliable and durable solution for automatic acid and liquid chlorine dispensing.

This system consists of a 15 gallon (56.7L) capacity UV resistant tank and low-power fixed output dosing pump. The tank cap is color coded and the tank is labeled as acid or chlorine for added safety.

Hayward makes liquid refill easier than ever employing an upright, convenient design with built-in handles and a spill containment barrier.

Hayward 120-12V Volt Transformer Now Available

Hayward introduces a 120-12 Volt low voltage transformer designed to provide a safe, isolated 12V electric supply to low voltage fixtures of all types and especially fixtures for swimming pools, spas and water features.

The 120V/60Hz transformer is UL approved and multi-tapped to provide 12V at the lighting fixture. The transformer is housed in a robust powder-coated weather proof enclosure suitable for outdoor installation.

The transformer is already wired for the incoming 120V main power supply and includes a convenient and water proof on-off switch eliminating the need for the installation of a separate switch.

Three cord seals and a grounding lug are included to ensure secure wiring to the fixtures.

These 120 volt transformers are part of the Hayward lighting program that includes single color incandescent and full color spectrum LED lights to perfectly illuminate and enhance both residential and public pools of all types.
